SEXUAL HEALTH ACTIVITY EVALUATION TEMPLATE

Evaluating sexual health programs can test the effectiveness of activities in prompting behaviour change and any increases in knowledge.

The results can be used to advocate for more sexual health programs and provide information for reporting on program outcomes for funders and managers.

You can print the evaluation sheet on the next page and use it at the end of activities and programs. You may choose to use a pre and post evaluation to track changes in knowledge and intention. The evaluation sheet template can be adapted to investigate the success of specific program objectives.
